Smart Lock User Manual

[Face recognition and Cat's eye Smart Lock]

Rev:20240514

Product parameters and drawing

1.1 Product parameters

Power supply	7.4V lithium battery
Typical static current	<70 microampere
Number of open faces	≤50 groups (users numbered from 2 to 100)
Number of fingerprints	≤99 groups (numbered from 2 to 100 users)
Number of door opening machine	≤100 groups (users numbered from 2 to 100)
Number of door opening codes	≤100 groups (Administrator number 1, user number 2-100)
Image sensor	1/4" CMOS, 1280x800 image count
Camera lens	84.2° field Angle, focusing distance 50cm(35.5-84.7 cm), <1.5% distortion rate
Quick unlock time	≤2 seconds
Face recognition distance	0.3~1 m
Operating temperature	-10°C to 60°C
Relative humidity	20% ~ 93%

1.2 Proudct Drawing

2 Product List and Installation Drawing

2.1 Product List

No.	Name	Quantity	Remark
1	Front panel (including rubber pad)	1 piece	
2	Rear panel (including rubber pad)	1 piece	
3	6068 Mechanical lock mortise	1 piece	
4	Installation kit	1 pack	
5	User manual	1 volume	
6	Certificate of qualification	1 sheet	
7	Lithium battery	1 piece	
8	key	2 handfuls	
9	Side panel	1 piece	
10	Opening template	1 sheet	
11	IC card	2 pcs	

2.2 Installation Drawing

3.1 Open hole on door

Draw a horizontal center line 1 meter from the ground on both sides of the door.
 Fold the opening template in half, align the center line of the handle of the opening template with the horizontal line on the door, and draw the opening line on the front and side of the door according to the requirements of the opening template.
 Open the mounting holes of the panel and lock mortise according to the requirements of the opening template.

3.2 Install lock mortise

1. Insert the lock body into the opened door hole (for a door with a heaven and earth bar, connect the heaven and earth bar hook on the lock body to the heaven and earth bar inside the door).

2. Install the lock body to be installed into the lock body hole and fix it on the door with four wooden door tapping screws or four M5x10 machine wire screws.

3.3 Install lock mortise

- 1. Insert the lock mortise into the lock body, fasten with screws.
- 2. Based on the facade, the length of the rear pulling rod of the lock core tail is retained 18MM, and the excess part is removed.

3.4 Front panel mounting

 The waterproof rubber pad is set on the front lock body, and the two hollow studs are locked on the front lock body
 Thread the connecting wire of the front panel through the hole in the door, and then close the front panel to the door.

3.5 Rear panel mounting

 The waterproof rubber pad is set on the back bottom plate, and the connecting line of the front panel passes through the hole of the back bottom plate.
 As shown in the figure, and then the back bottom plate close to the door, aligned with the front panel hollow studs, using 2pcs M5 screws fixed, adjust the front panel and the bottom plate to keep flush with the door frame, to prevent the impact of eccentricity door lock use effect.

3.6 Install rear panel

1. Connect the air connection of the front panel to the rear panel.

2. Align the quick-opening square shaft lock core tail hook and anti-lock flat bar successively and insert them into the corresponding hole. (The locking flat strip is cut according to the thickness of the door)

3. with 6pcs M5 screws and the bottom plate fixed.

3.7 Door buckle plate and door buckle box installation

1. Close the door and the door frame, draw the position of the lock tongue on the door frame with a pencil and then draw the opening shape of the door frame.

2. After opening the hole, place the door fastener in the box and fix the door fastener with 4 screws in the order shown on the left.

3. After closing the door, test whether the lock tongue can be fully extended.

3.8 After installation debugging

- 1. Install battery and cover to make the door lock work normally
- 2, Pull the lock knob to check and adjust until smooth.

3. Insert the mechanical key into the lock hole of the front plate, turn the key accordingly to check whether the mechanical key can open the door normally.

4.Test the function of the door lock after setting the door lock according to the door lock operation guide.

4.1 Door lock function operation extension map

S61 intelligent door lock operation map

1.Language switch (initial state use)

555666888# Use Chinese 555666880# Use English 555666881# Use Vietnamese 555666882# Use Portuguese 555666883# Use Arabic 555666884# Use Russian 555666885# Use the Kazakh language 555666886# Use Spanish 555666889# Use French

2. Initial status

Factory default management password is "123456" can unlock the door; Before use, you need to change the management password to access the menu; In the initial state, the body sensor will automatically open, any face can unlock the lock.
